

ENERGY & INDUSTRY SOLUTIONS

Supporting you across the full asset life cycle

HILTI
FX 3

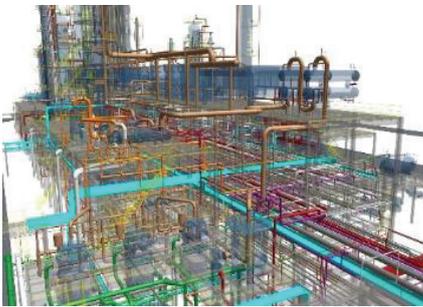

Total project support

Energy and Industry tailored solutions

We differentiate through Modularity, Sustainability, Automation, Productivity.

Focused on innovative, segment-specific solutions, we work closely with you to help bring down total costs over the life cycle of an asset through accelerated project schedules and improved operational efficiency.

Reduced total cost of ownership to asset owners and operators

Improved asset safety and reliability

World-wide presence, close to your operations, we develop and provide certified and approved solutions that minimize risk and improve quality of work.

Schedule de-risking

Decoupling engineering and construction to support your critical path.

Reduced total cost of ownership

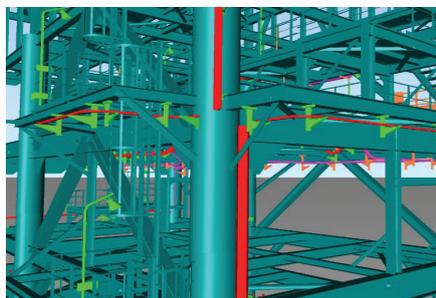

Hilti solutions are designed to reduce cost over entire plant life-cycle from initial investment, operation and maintenance

Improved productivity through engineering and construction

Workflow and digital integration

Integrating through engineering, modeling, logistics, installation and asset management services.

Industry tailored solutions

Tailored project solutions for the Energy sector with modular secondary support structures, fire-protection and fixation systems.

Reduced total cost of installation

Improved engineering productivity through automation, digitalisation and modularisation.

We provide tailored solutions to the O&G sector on a wide range of applications

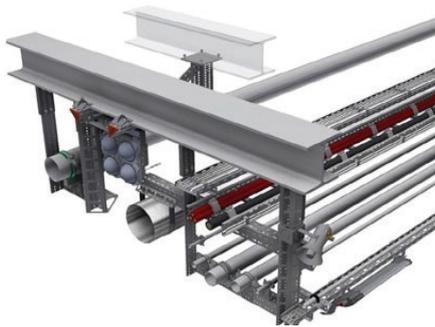

Raised Floor System

Integrated system combining supports for cabinet, floor tiles and cable routing.

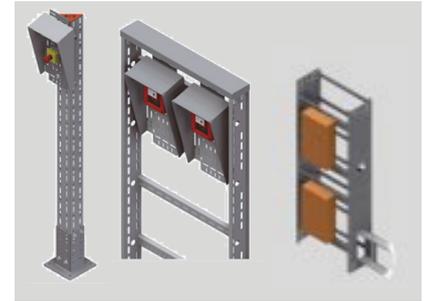

Multi Disciplinary System

Complete design of multi-service and light-weight system combining Electrical, Instrumentation and HVAC system.

Modular Instrumentation Stands

Design and prefabrication of light-weight and flexible modular system.

Cable trays and ladders

SP3D and PDMS 3D libraries for FRP, SS and HDG for higher loads with increased support spacing.

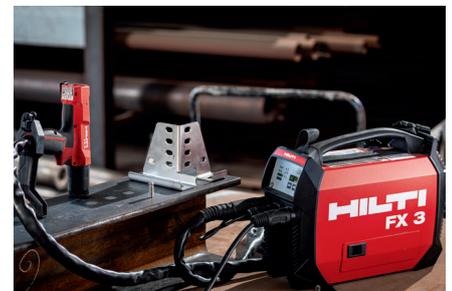

Passive fire protection

Over 30 years experience, internationality approved and tested fire-protection systems.

Fastening on Steel Solutions

Post-paint and cold-work fastening technology system with no re-work.

Tool park management

Asset management system providing flexibility, transparency and productivity.
